

— AI-POWERED EXPORT INFRASTRUCTURE

From Factory Floor to **Global Market.**

The export operating system for Indian manufacturers — AI documentation, buyer discovery, shipment tracking and financing in one enterprise dashboard.

● Live platform · AI Doc Generator working

● Pilot manufacturers onboarded

● Mumbai · Pune

Sarthak Wage — Founder & CEO · Sameer Morya — Co-Founder & CTO · info@arthaflowglobal.com

99.7% of Indian Manufacturers **Don't Export**

Not because their products aren't good enough — because the export infrastructure doesn't exist for them.

Documentation Nightmare

IEC, HS codes, shipping bills, certificates of origin — 40+ documents per shipment. Most give up here.

No Buyer Access

Zero visibility into who's buying, where, or how to reach verified international buyers. Listing boards aren't matchmakers.

Logistics Overwhelm

Freight, customs, insurance, incoterms — 15+ decisions per shipment. One mistake = delayed cargo + penalties.

"I spent 2 years trying to figure out how to export. I gave up after the documentation."

Policy Mandate

Govt targeting **\$2T exports by 2030**. District Export Hubs, RoDTEP & PLI actively pushing MSMEs outward — now *funded* national policy.

China + 1

Global buyers de-risking from China. India is the #1 alternative — but they **can't find verified Indian suppliers**. Demand is hunting for supply.

AI Inflection

Documentation that needed a consultant 24 months ago now costs **₹0 in marginal compute**. The core friction became automatable for the first time.

MSME Digitization

AI export docs in 30 seconds — not 3 days

3

Find Buyers

Verified international buyer discovery

4

Track Shipments

Live timeline from factory to port to buyer

5

Financing

Trade finance & payment settlement

Export Saathi guides every step — our AI advisor surfaces market trends, demand signals and pricing intelligence so manufacturers **make the right export decisions**, not guesses.

A Nashik factory owner doesn't read trend charts. He asks Saathi a question — in Marathi, Hindi or English — and gets a clear export decision back, grounded in real trade data.

Saathi

• Online • powered by ArthaFlow Intelligence

मेरे hydraulic cylinders कहाँ export कर सकता हूँ?

आपके product (HS 8412) की सबसे ज़्यादा demand अभी **Germany, USA और UAE** में है। Germany में पिछले साल **+18% growth** हुआ। Average price ~\$340/unit. → **UAE के लिए documents बनाएं**

सही price क्या रहेगा Germany के लिए?

Comparable shipments के हिसाब से **\$320–360/unit (CIF)**। \$340 quote करना safe रहेगा — इससे नीचे मत जाइए।

 Speaks their language

Marathi, Hindi & English. No competitor serves tier-2/3 manufacturers conversationally in their own language.

 Grounded in real data

Every number is retrieved from our trade-intelligence pipeline — never guessed. Trusted advice, not a toy chatbot.

 Answer → Action

Every reply ends in a next step — generate docs, find a buyer, check readiness. The front door to the entire platform.

fulfilment partnership is already signed.

 AI Document Generator — working

Select product → AI generates export sheets, HS classifications & proforma invoices grounded in the manufacturer's real data → saved to vault → PDF.

 Export Saathi — live

AI export advisor answering compliance, HS-code & market questions inside the dashboard.

 Full manufacturer dashboard

Product catalogue, document vault, buyer inquiries, shipment tracking, readiness scoring — all live on real backend infrastructure.

 First partnership signed

Warehousing + verified buyer database — the two hardest physical-layer problems, solved through partnership.

07 — The Product

75%

Every transaction makes us permanently harder to displace.

The Data Flywheel

The Data Asset durable · compounding

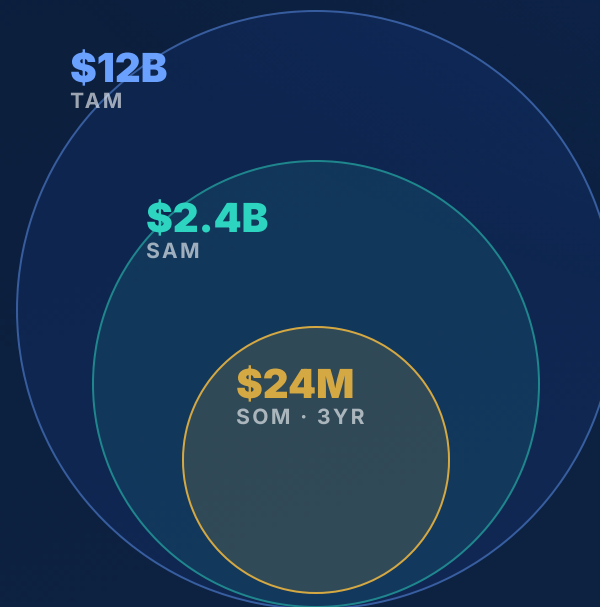

Verified manufacturers + realized shipment history. Powers credit underwriting & data-driven trading later. A competitor rebuilds from zero.

Two-Sided Network

Each manufacturer makes the buyer side stronger, and vice-versa. Liquidity self-reinforces and resists displacement at scale.

A \$12B wedge into Global Trade

We start narrow — tech-ready manufacturers in Maharashtra's export clusters — then expand sector by sector, state by state.

TAM — \$12B

Export services market for 57M Indian MSMEs.

SAM — \$2.4B

Tech-ready MSMEs in the top 6 export sectors & manufacturing hubs.

SOM — \$24M in 3 years

10,000 manufacturers in Maharashtra at ~\$200/month average revenue.

- ✓ Limited AI doc generations
- ✓ Single product listing
- ✓ Readiness score
- ✓ HS Code Finder

CORE TIER

Growth

- ✓ Unlimited AI documents
- ✓ Full product catalogue
- ✓ Buyer discovery & matching
- ✓ Saathi AI advisor + priority support

Enterprise

- ✓ Everything in Growth
- ✓ Dedicated export manager
- ✓ API access & integrations
- ✓ White-label export option

COMMISSION ENGINE — EARNED ON EVERY FACILITATED SHIPMENT

Top barriers validated: docs & buyers

1

Fulfilment partnership signed

✓ What we've proven

- Working platform — AI Doc Generator & Saathi live
- 5 pilot manufacturers actively onboarded across Mumbai & Pune
- Partnership signed: warehousing + verified buyer database
- ~50 interviews → the two killer problems are **documentation** and **buyer finding** — exactly what we built first

→ SOON Next 2 Quarters

- Convert pilots → 20+ paying manufacturers

COMPETITIVE LANDSCAPE

Nobody Owns End-to-End

Others solve one slice. We vertically integrate documentation, buyers, logistics & compliance — powered by AI, priced for MSMEs.

CAPABILITY	ARTHAFLOW	INDIAMART	FREIGHT FWD.	CONSULTANTS
AI Documentation	✓	✗	✗	manual
Buyer Matching	✓	listings	✗	✗
Logistics	✓ via partners	✗	✓	✗
Compliance	✓	✗	✗	manual
MSME Pricing	✓	✓	enterprise	₹50K+/ship
AI-Powered	✓	✗	✗	✗

Our moat: Vertical integration + AI + proprietary compliance knowledge base, purpose-built for Indian MSMEs.

Builders Who Know **Both Sides**

Deep technical execution meets operations & go-to-market — and firsthand understanding of the Indian MSME export ecosystem.

Sarthak Wage

Founder & CEO

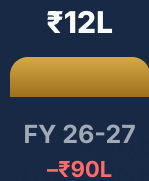

Creative technologist. Previously CTO at a 3D game-dev startup — scaled to 6-figure USD revenue & raised multiple rounds. Full-stack product engineering, applied AI, and design-driven development. Takes ideas from blank page to production.

Sameer Morya

Co-Founder & CTO

Strategy-to-tech operator building ArthaFlow's end-to-end AI architecture & technical pipelines. Previously Strategy & Ops at SeekMyCOURSE — investor materials, scaling, cross-functional initiatives. Robotics & AI, KJ Somaiya.
